

Are You ADA Compliant?

Q: Does my pool need a pool lift?

A: Any pool open to the public with 300 linear feet or more needs two means of access. Any commercial pool with less than 300 linear feet needs one access point.

Q: What is a point of access?

A: A point of access MUST be either a pool lift or sloped entry.

Q: How do I know if my pool lift is ADA compliant?

A: Here are some basics to check on your lift.

- 1. Lift must have a capacity of 300 lbs or more.*
- 2. Lift must have a solid seat and a foot-rest. Sling seat styles are not compliant and should be replaced.*
- 3. Lift must be self operable from the deck and the water. A lift with manual rotate or hand crank is not compliant and should be replaced.*
